RESIDENTIAL PROGRAMS

Purpose/Introduction

The purpose of residential programs is to ensure that a range of residential services are available for mentally and physically handicapped adults and children, battered women and their children, indigent adults facing temporary unemployment and adults who are homeless and/or facing personal crisis.

The major program areas in 1983/84 were as follows:

Community Residence Program for Disabled Persons

Non-profit agencies, funded by the Department, operate small community based residences to assist mentally and physically handicapped persons in their development towards greater independence by providing room and board, supervision and skill development activities. There were 1,009 spaces funded in 1983/84.

Approved Home Program

This program provides handicapped adults with supervised, private home based living options and life skills training. The goal is to assist these persons to develop sufficient independence to live in a less restrictive residential setting. Approved home projects operated by non-profit agencies and funded by the Department provided 262 spaces in 1983/84.

Program Workers

This program is intended to increase the self help and independent living skills of mentally handicapped persons by working directly with the person or assisting parents, residential or day program staff in implementing individual programming. In 1983/84 there were 69.5 program workers employed by non-profit associations with funding by the Department.

Department Operated Residential Services for the Handicapped

Residential accommodation with treatment and training is provided through several department operated comprehensive service programs. These programs include the following: Resources for the Dependent Handicapped, Baker Centre, Wetaskiwin Centre, Eric Cormack, Rosecrest Home, Behavioural Services and Michener. The total spaces for these programs was 1,859 in 1983-84.

Emergency Women's Shelters

Non profit agencies funded by the department provide short term safe and supportive residences for battered women in crisis, and an opportunity to learn of services and alternatives for herself and her family. There were 264 spaces funded in 1983-84.

Hostels for Single Adults

This program temporarily provides for meals and accommodation for employable and temporarily unemployable adults in need of assistance. Hostels are operated both by the Department and non-profit agencies, totalling 766 spaces in 1983-84.

Adult Care Centres

This program provides Department operated residential services to indigent, homeless adults who require a sheltered environment to help them regain and maintain health, and social functioning skills. Adult Care spaces totalled 215 in 1983-84.

FEEDBACK FORM

Your feedback on this report would help us to present the annual Residential Services Program statistics in the most useful format in future. Please feel free to comment on:

- Accuracy (Are there any errors?)
- Completeness (Are there any significant omissions?)
- Format (Are there better ways to present the information?)
- Context (Are there other information or comparisons you would like to have done?)
- Relevancy (Is the information useful? How?)
- Adequacy (Is there enough/too much information?)
- Other thoughts, suggestions, observations, etc.
